

567—122.15(455B,455D) Further requirements for batteries for CRT recycling facilities.

122.15(1) CRT recycling facilities shall manage waste batteries derived from discarded CRTs in a manner that prevents release of any hazardous material into the environment.

122.15(2) Any battery that shows evidence of leakage, spillage, or damage that could cause a release of hazardous material into the environment must be contained in a container that is compatible with the contents of the battery.

122.15(3) All batteries must be managed in accordance with all state and federal regulations.
